

*The Revolution In  
Preventive Medicine is here.*

The Virtual Physical™ is a revolutionary approach to preventive medicine that gives you a remarkably precise 3-D visualization of your body.

In a non-invasive, open environment, taking just a few minutes, it can detect early signs of:

-  Diseases of the Spine
-  Heart Disease
-  Cancer
-  Kidney & Gall Stones
-  Osteoporosis
-  Aneurysms
-  Cysts or Tumors
-  Ovarian Disease
-  Endocrine Disease
-  Vascular Disease
-  Diseases of the Lungs
-  Prostate Disease

*Cost for Virtual Physical  
and Related Services:*

TOTAL BODY VIRTUAL PHYSICAL including cardiac scan . . . . .	\$995.
VIRTUAL PHYSICAL including cardiac scan and VIRTUAL COLONOSCOPY . . . . .	\$1595.
VIRTUAL COLONOSCOPY . . . . .	\$895.
VIRTUAL CARDIAC AND LUNG SCAN . . . . .	\$695.
VIRTUAL LUNG SCAN . . . . .	\$595.

## *Detect Diseases in their critical "Pre-Symptom" stage.*

While the annual physical is still important, the Virtual Physical's early detection capability can uncover asymptomatic and often life-threatening diseases generally not detectable by a physical exam or standard screening tests. This allows the management of disease in early stages, where medical therapy and treatment options are typically less costly, less invasive and more effective.

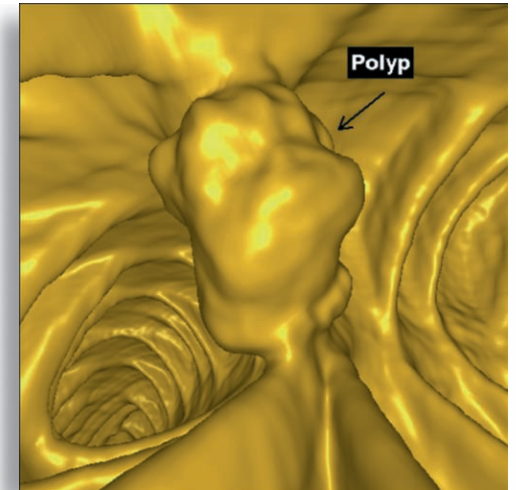

## *You can literally take a 3-Dimensional tour through every organ in your body.*

Virtual Physical's comprehensive scan of your body is far more detailed and precise than an X-ray. It covers: the heart and arteries identifying near microscopic amounts of plaque; the lungs at the air cell level showing the earliest stages of smoke damage, emphysema, or lung cancer; the spine, evaluating for osteoporosis, disc disease and other back problems; internal organs for detection of tumors, stones and cysts of all sizes; aneurysms in the abdominal and chest cavities; thyroid and parathyroid disease; joint disease; uterine, ovarian and prostate disease.

## *Analysis by a Board Certified Radiologist*

Once your Virtual Physical is completed, a Board Certified Radiologist will review it with you, noting any problems that may require further evaluation. You'll leave with the Radiologist's written analysis, a CD-ROM of your entire Virtual Physical and relevant photographs of your scan. At your request, the Virtual Physical report can be forwarded to your personal physician or a specialist for additional evaluation and treatment.

## *The non-invasive Virtual Colonoscopy.*

The Virtual Colonoscopy is a new method of imaging the entire colon that is simpler, faster, and less invasive than conventional colonoscopy. It requires no sedation and can simply be incorporated in the overall Virtual Physical. The technology provides higher resolution with faster scanning. This results in a more detailed 3-dimensional viewing capability adding to the diagnostic value of your examination.

## *About Virtual Physical*

Virtual Physical was established by concerned health care professionals who saw this test as a powerful new weapon against heart disease, cancer and other deadly illnesses. With widespread use, the Virtual Physical will help people lead healthier, longer lives.
